come to visit us .

Join us at the **Flat ID-8** exhibition to explore a curated collection of innovative furniture designs.

2025 | Kitchens · Storage · Bathrooms · Wooden Furnitures · Recycled Furnitures · Artificial Stones

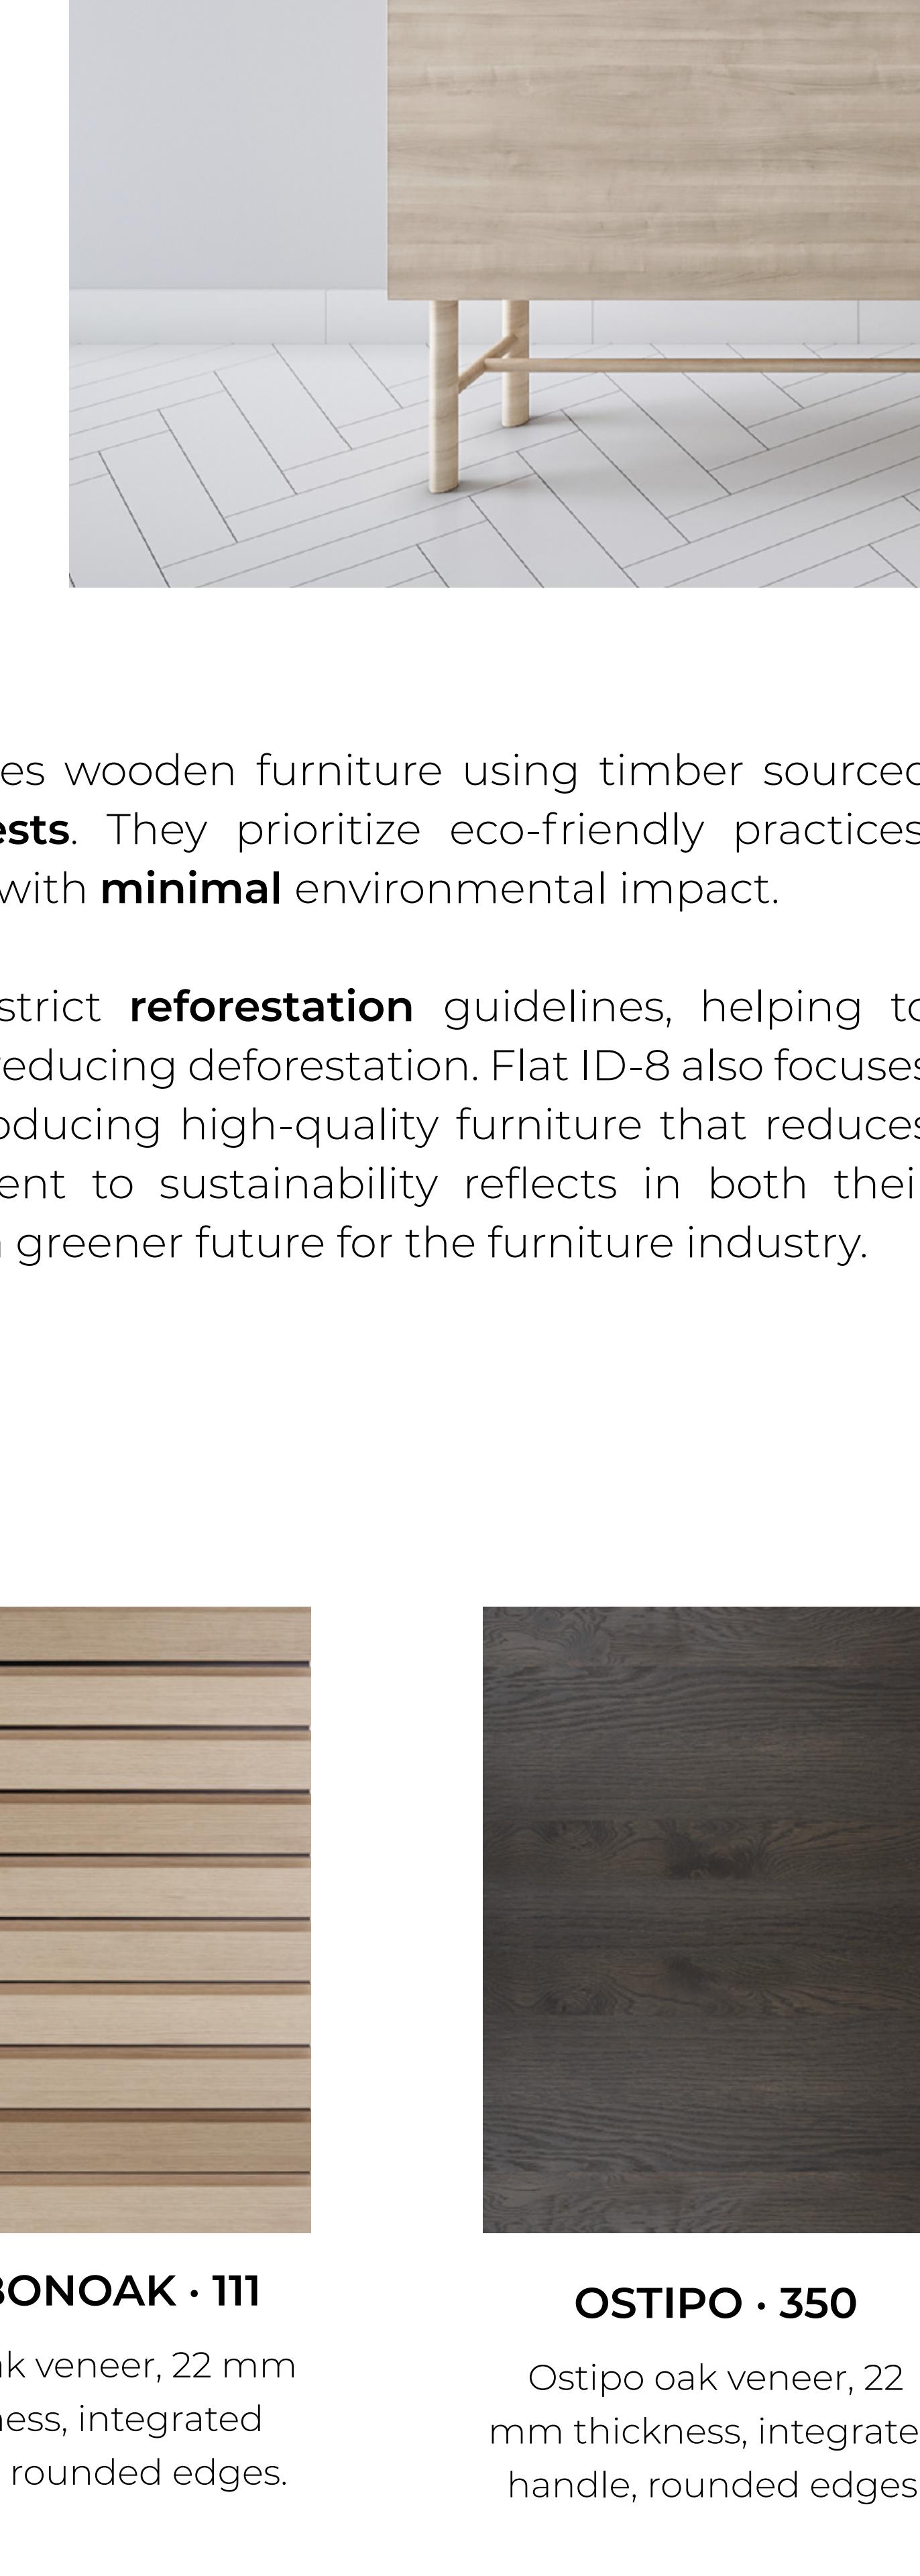

NATURE

NATURE by Issey Miyake

This **bathroom** furniture piece, designed by **Issey Miyake**, draws its inspiration from the fluid beauty of nature. The organic lines mimic the soft curves of flowing water, with surfaces that seem to ripple gently like a stream. The materials blend **natural wood** with delicate stone, evoking the serenity of a forest or a riverbank.

Subtle textures on the cabinet doors resemble leaves or bark, adding a tactile element that invites **touch**. The design embodies a harmonious balance between simplicity and **elegance**, offering a peaceful, nature-infused atmosphere to any bathroom space.

The furniture's color palette reflects **earthy tones**, with soft greens, deep browns, and gentle grays, reminiscent of a tranquil woodland setting. Miyake's attention to detail is evident in the way **light** interacts with the surfaces, creating subtle **shadows** that mimic sunlight filtering through trees.

Flat ID-8 designs and manufactures wooden furniture using timber sourced exclusively from **sustainable forests**. They prioritize eco-friendly practices, ensuring that each piece is crafted with **minimal environmental impact**.

Their wood suppliers adhere to strict **reforestation** guidelines, helping to preserve natural ecosystems while reducing deforestation. Flat ID-8 also focuses on long-lasting **craftsmanship**, producing high-quality furniture that reduces waste over time. Their commitment to sustainability reflects in both their materials and designs, promoting a greener future for the furniture industry.
